ETIP PV Annual Conference 2024

Digitalised and responsive PV: The driver of Grid and Market evolution

DAY 1 22 May

Opening session

Welcome speeches

Policy keynotes

- Driving the RepowerEU process through a revamped market model with PV central in energy mix
- Resilient multi-vector energy systems from the continental scale to the building level

Session 1 (14:30-16:00)

PV systems intelligently contributing to effective distributed control

Session 2 (16:30-18:00)

Energy sharing building functional Energy Communities

Day 2 23 May

Session 3 (09:30-11:00)

Highly responsive PV in a flexible power system

Session 4 (11:30-12:45)

Enhancing PV industry efficiency through focused digitalised control and data sharing architectures and models (ETIP SNET)

Closing session
